

# Matthew Ham

New York City, NY | (347) 491-6533 | mham1@binghamton.edu | linkedin.com/in/matthewham | github.com/ham70

## EDUCATION

### Binghamton University, State University of New York

Bachelor of Science in Computer Science

Expected May 2027

Cumulative GPA: 3.61/4.00 | Dean's List: Spring 2024 & 2025

Honors: Upsilon Pi Epsilon Honor Society

Coursework: Data Structures and Algorithms, Object-Oriented Programming, Computer Architecture, Operating Systems

## PROJECT EXPERIENCE

### Ether Status – Location-Based Environmental & Demographic Web App

July 2025

- Built a cross-platform location insights app using **React Native**, **Expo**, and **TypeScript** to display real-time weather, air quality, and U.S. Census demographic data by county
- Engineered a backend using **Node.js**, **Express.js**, **TypeScript**, and **SQLite** to handle API requests and cache popular city queries, improving load times for repeat searches and reducing API overhead
- Integrated external APIs, including **Google Cloud Platform APIs** (e.g., Geocoding) and the **U.S. Census Bureau API**, to aggregate and present comprehensive location data

### NYC Cheap Eats – Full-Stack Restaurant Finder Web App

January 2024 – September 2024

- Developed a full-stack restaurant finder for affordable New York City locations using **React**, **Node.js**, and **MongoDB**
- Optimized **REST API** routes with **Express.js**, hosted using **Vercel**, and reduced server downtime and improved client-server data transfer speeds by **up to 50%**
- Integrated dynamic JavaScript maps using the **Google Maps API** and browser **Geolocation**, with proximity-based restaurant filtering for enhanced user experience results

### User Management System – Group Project

November 2024

- Guided **2 other team members** through design decisions, conducted code reviews, and provided feedback to ensure C++ implementation aligned with performance goals and met efficiency **optimization requirements**
- Delivered a **live project demo** to a teaching assistant, showcasing system functionality and design decisions

## PROFESSIONAL EXPERIENCE

### Software Developer Intern, Binghamton University | Binghamton, NY

October 2024 – Present

- Automate university workflows, such as semester withdrawal forms, using **JavaScript**, **Graphene**, **Hermes API**, and **Mustache Templates**, reducing manual workload and improving operational efficiency
- Write user documentation for applications, ensuring clear guidance and seamless adoption of internal tools
- Investigate secondary university accounts, gathering information on uses and staff sponsors to aid in ensuring university security by flagging suspicious or unused user accounts

### IT Intern, Binghamton University | Binghamton, NY

August 2024 – Present

- Collaborated with a team of 30 consultants to provide **IT support** to students in residence halls, ensuring consistent service quality and timely issue resolution for a wide range of personal IT issues
- Diagnosed and resolved technical issues for **Windows** and **MacOS** devices, enabling seamless connectivity

## LEADERSHIP

### HackBU, Vice-President of Outreach – Organizer

November 2023 – Present

- Engage in promotional initiatives and logistics for a 24 hour annual hackathon with over **200 participants**, ensuring seamless check-ins and fostering a safe, collaborative environment
- Execute hackathon sponsorship outreach strategies through cold email and LinkedIn using custom **HTML** templates

### Triathlon Club, Co-President – Member

August 2024 – Present

- Lead outreach efforts, foster involvement, and negotiate with apparel companies to secure a partnership and establish a new uniform provider, enhancing team branding and affordable pricing
- Encourage involvement and support the development and facilitation of club activities such as tabling events, practices, and competitions

## TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Java, C/C++, SQL

Software and OS: Git, GitHub, VSCode, Docker, Postman, Apache NetBeans, Vim, Linux, Windows

Additional: React/React Native, Expo, HTML/CSS, JSON, Next.js, Node.js, Express.js, Mustache, Material UI, Google Cloud Platform (GCP), Amazon Web Services (AWS), SQLite, MongoDB, Firestore, Vercel
